MILACRON®

# SPARE PARTS

We understand how each part in our machines interact with each other. This expertise and our drive to constantly upgrade machine performance and improve processing capabilities helps reduce cost of ownership.

We leverage our supply-chain management to plan, forecast and support material demand requirements for your machine throughout the life cycle. We look at parts in six categories that correlate with life expectancies. This is the basis for our recommended spare parts list that allow for minimal downtime by having the right parts at your facility ready to install.

GROUP	GROUP DEFINITION	RECOMMENDED SPARE PARTS LIST
<b>CONSUMABLE</b>	Parts with an expected life of a year or less	<ul style="list-style-type: none"> <li>- Filter Elements</li> <li>- Feedscrew Tip Assembly</li> <li>- Heaterband</li> <li>- Nozzle Heaterband</li> <li>- Nozzle Tip</li> <li>- Thermocouple</li> </ul>
<b>WEAR</b>	Parts with an expected wear life of ~1-5 years	<ul style="list-style-type: none"> <li>- Belt</li> <li>- Couplings</li> <li>- Skate, Wear Strip, Wear Pad</li> </ul>
<b>MOTION</b>	Parts that makes something else move on the machine	<ul style="list-style-type: none"> <li>- Air Valve</li> <li>- Cylinders</li> <li>- Actuators</li> </ul>
<b>CONTROLS</b>	Anything electrical or electronic	<ul style="list-style-type: none"> <li>- Drive Card Module</li> <li>- Fuse, Fuse Block, Terminal</li> <li>- Potentiometer</li> <li>- Transducer</li> </ul>
<b>SCREW &amp; BARREL</b>	Screws and barrels, for Injection End	
<b>STRUCTURAL</b>	Larger components typically replaced due extreme working conditions, not wear	

We offer the superior parts you need.
